Deutsche Qualität - German quality

MANIFOLD BALL VALVE 1" ANGLE WITH THERMOMETER

INTENDED USE

Ball valve designed specifically for installation in underfloor heating and radiator heating manifolds. Enables quick shut-off of the medium in the entire manifold.
Thanks to solid construction, high tightness and easy operation, it is a reliable component to every manifold.

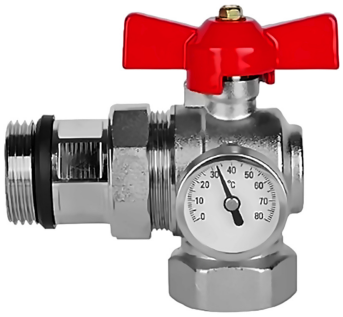

PRODUCT ADVANTAGES

- Ease of operation: One-quarter turn lever for fast opening and closing.
- High tightness: Sealing elements made of high-quality EPDM ensure reliable tightness.
- Corrosion resistance: Stainless steel body provides long-term durability and resistance to corrosion.

PRODUCT SPECIFICATIONS

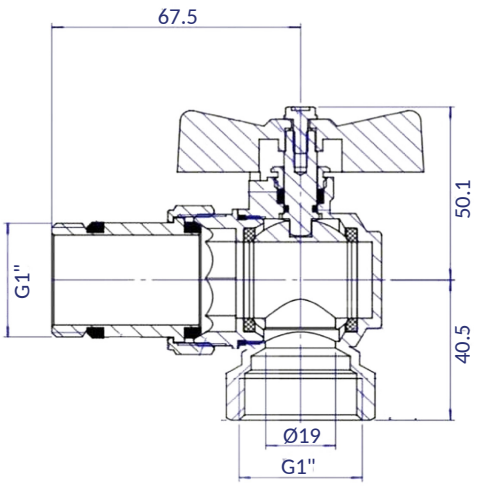

Product code	Product name
V90BT	Manifold ball valve 1” angle blue with thermometer
V90RT	Manifold ball valve 1” angle red with thermometer

TECHNICAL SPECIFICATIONS

Parameter	Value
Size	1"
DN	25
PN	16
Working temperature	110°C
Material	Stainless steel
Seals	EPDM + PTFE
